

18th century pinchbeck gold mesh bracelet

Sold

REF: 6863

Height: 19 cm (7.5")

Width: 5 cm (2")

Description

A rare 18th century pinchbeck gold mesh bracelet with ornate snap claps, circa 1790.

Pinchbeck is a type of alloy invented in the early 18th century by Christopher Pinchbeck, an English watchmaker. Composed primarily of copper and zinc, it closely resembles gold in appearance, making it a popular substitute in inexpensive jewellery and decorative objects. Pinchbeck was especially valued during a time when gold was heavily taxed and restricted to the upper class.

Unlike gold-plated items, Pinchbeck does not easily tarnish and retains its bright, golden lustre. Its popularity declined in the 19th century with the rise of cheaper electroplating techniques, but it remains a historically significant example of early imitation gold alloys.
