

9ct gold pink and blue topaz ring

£245

Description

A 9ct gold ring set with pink and blue topaz.

UK Ring Size: Q

Topaz is a silicate mineral prized for its brilliance, durability, and wide range of colours. Commonly found in shades of golden yellow, it can also appear blue, pink, clear, or even colourless.

Topaz forms in igneous rocks, often within granite and rhyolite cavities. Major sources include Brazil, Sri Lanka, Russia, and Nigeria. In ancient lore, topaz was believed to bring protection, clarity, and strength.

Today, it is the November birthstone and symbolises love, warmth, and good fortune, blending beauty with rich cultural significance.
