

Bates & Bacon patent rocket cheroot cutter

£145

Description

An Edwardian first world war Bates & Bacon patent rocket cheroot cutter in yellow metal, to be worn on a watch chain.

The Bates & Bacon patent rocket cheroot cutter, patented in the early 20th century, is a mechanical device designed for precisely cutting cheroots and cigars. Its innovative design featured a rocket-shaped cutter mechanism, enhancing efficiency and uniformity. This tool reflects the era's focus on practical yet stylish smoking accessories.
