

Edwardian rolled gold bangle

Sold

Description

An Edwardian engraved rolled gold hinged bangle, circa 1910.

Rolled gold is a durable and cost-effective alternative to solid gold, created by bonding a thin layer of gold to a base metal, such as brass or copper, through heat and pressure. This technique ensures a thicker gold layer than traditional gold plating, making it more resistant to tarnish and wear. Rolled gold is prized for its rich appearance and affordability, making it a popular choice for high-quality jewellery, watches, and accessories with enduring elegance.
