

White metal cloak pin

£75

REF: 6623

Height: 8.5 cm (3.3")

Diameter: 3 cm (1.2")

Description

A large white metal cloak pin with embossed thistle design set with a large faceted cairngorm, circa 1920

Cairngorm stone is a variety of smoky quartz found in the Cairngorm Mountains of Scotland. Renowned for its rich brown to golden hues, it has been prized for centuries as a decorative gemstone in traditional Scottish jewellery, such as kilt pins and brooches.

Historically associated with strength and protection, it is often linked to the Scottish clans and heritage. Cairngorm stones are cherished for their beauty, durability, and connection to Scotland's rugged, natural landscape.
