

18ct white gold diamond half eternity ring

£1,950

Description

An 18ct white gold half eternity ring set with a progressing row of brilliant cut diamonds.

UK Ring Size: O

Brilliant cut diamonds are expertly shaped to maximise sparkle and brilliance. This cut typically features 57 or 58 facets, carefully angled to reflect light beautifully. Developed in the early 20th century, the round brilliant cut remains the most popular diamond shape world-wide. Its symmetrical design enhances the stone's fire and scintillation, making it highly desirable for engagement rings and fine jewellery.

Precision in cutting is crucial, as slight variations can affect the diamond's brilliance. Brilliant cut diamonds symbolise elegance and timeless beauty, often chosen for their unmatched ability to shine intensely under various lighting conditions, making them a classic and enduring favourite.
