

1920's single strand of pearls with a white gold and diamond set clasp

£125

Description

1920's single strand of pearls with a white gold and diamond set clasp

Pearls are unique gemstones that can improve with wear. The natural oils from human skin can enhance a pearl's lustre and colour over time, maintaining their beauty and sheen. Regular wear helps keep pearls hydrated, preventing them from drying out and cracking, thus preserving their delicate surface and radiant appearance.
